

Design Criterion

The #9000 **Champion** chair is designed for an elegant look at an affordable price using 1" square tube, 18 gauge steel as its structural frame. The wide range of options and colors give the **Champion** a near custom made quality. The strong lines and deep curves give design features normally found in products twice the price. Back height can be 11" or a full 17" depending on the design preference. Other options include arms, underseat or side mount bookracks. Chairs stack for ease of moving.

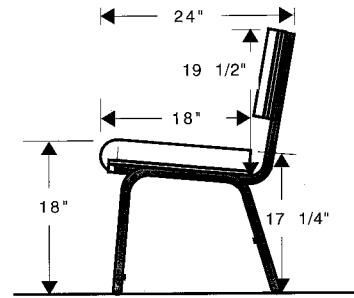

Material Specifications

Item	Dimensions	Material	Foam	Fabric	Finish
Backs	1 7/8 x 11 x 17 7/8	Plywood - Poplar	1 1/4"	.46yds	Fabric
